The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
1) Responsive to communication(s) filed on					
,-	,—				
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.					
Disposition of Claims					
4) Claim(s) 1-14 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) is/are allowed. 6) Claim(s) 1-14 is/are rejected. 7) Claim(s) is/are objected to. 8) Claim(s) are subject to restriction and/or election requirement.					
Application Papers					
9) The specification is objected to by the Examine 10) The drawing(s) filed on is/are: a) accomplicated any objection to the Replacement drawing sheet(s) including the correct 11) The oath or declaration is objected to by the Examine	epted or b) objected to by the drawing(s) be held in abeyance. Section is required if the drawing(s) is object.	e 37 CFR 1.85(a). jected to. See 37 CFR 1.121(d).			
Priority under 35 U.S.C. § 119					
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. 					
Attachment(s) 1) Notice of References Cited (PTO-892) 2) Notice of Draftsperson's Patent Drawing Review (PTO-948) 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date 10/8/02.	4) Interview Summary Paper No(s)/Mail D 5) Notice of Informal F 6) Other:

Art Unit: 2817

DETAILED ACTION

Claim Objections

Claim 8 is objected to because of the following informalities:

Claim 8, line 8, " a low noise amplifier <u>amplifier</u>" should read -- a low noise amplifier --.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Kim et al., U.S. Patent # 6,020,787.

Fig. 11 of Kim et al. discloses a power amplifier comprising: amplifier 304 can be read as a low noise amplifier (see spec. col. 2, lines 52-55); VVC circuit 506 which has variable capacitor 812 can be read as a ferro-electric tunable component (see spec. col. 4, lines 46-48),. VVC circuit 506 can be read as a power amplifier output matching circuit; control signal 527 to control variable capacitor 812 can be read as a control line; circuit 219 can be read as a control source.

Art Unit: 2817

Regarding claim 5, transmission line 818 can be read as an inductor; transmission line 820 can be read as a second inductor; transmission line 822 can be read as a third inductor; amplifiers 520, 504 can be read as a low noise amplifier.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 8-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al., U.S. Patent # 6,020,787.

Regarding claim 8, although Kim et al. does not mention about a battery, a transceiver, a user interface, a housing encasing the battery and the transceiver and adapted to present the user interface external to the housing, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to have a battery, a transceiver, a user interface, a housing encasing the battery and the transceiver and adapted to present the user interface external to the housing connect to the low noise amplifier and the ferro electric tunable component in order to have a practical use for the amplifier since this is well known in the art.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents # 6,101,102 of Brand et al., # 3,739,299 of Adler, # 6,054,908 of Jackson contain some limitations of the claimed invention.
